

Feedback on the Oral Presentation for the QE

Name of Student: _____

Date: _____

On the feedback form we are looking for comments about the student's presentation skills (e.g. talked too fast or too slow, read from text, didn't speak clearly or loud enough, didn't look at the committee, went over the time limit, and things like that). Whereas the Comments Form that the committee also completes is more about the research and whether the student addressed the committee's concerns written on the Comments Forms from the written proposal.

What went well?

What can be improved?
